

Technical Data Sheet

AF-612

Ingredient Aqueous emulsion of silicone oil and hydrophobic particles

Warranty 6 months (kept in a cool, dry place at room temperature)

Applications AF-612 is used in

- Papermaking and pulping
- Industrial cleaning
- Textile printing and dyeing

Features

- The product can suppress foam for a long time
- Resistant to strong alkali and high temperature
- Good versatility
- Less silicon precipitation

Physical indicators

Exterior White or slightly yellow milky liquid

Solid content (14-16) %

pH value 6.0-9.0

Viscosity, 25°C 500-5000mPa.s

Instructions

- It can be added directly or diluted to low content.
- It can be diluted directly with water, but it needs to be used immediately. If it needs to be stored for a certain period of time after dilution, please consult our company and we will provide professional dilution methods.
- The amount of pulp added per ton is 0.05~0.5kg.
- The adding point is generally selected where the defoaming agent is easily dispersed, and a metering pump can be used to add continuously.

Precautions

- There are no fatal or harmful ingredients to the human body, but try not to touch it directly or use it if it accidentally gets into the eyes, rinse with clean water
 - Storage at room temperature (5-40°C), away from direct sunlight
 - Refer to the product's Material Safety Data Sheet (MSDS) before use
